About Us

ROY BATO
CEO/ FOUNDER

Founded in 2004, IB Solutions IBS Worldwide Corp is duly registered corporation engaged in the business of technology solutions and over the years has expanded into telecommunication, broadcast, advertising, fintech, aviation, data science, food and beverage and more.

Over 1 billion pesos monthly transactions run through IBS developed applications. Across 146 cities in the Philippines a handful companies are using IBS technology which is why we are considered as one of the most trusted software company in the Philippines.

Since its inception IBS Worldwide Corp has successfully delivered solutions to more than 1,000 customers in Australia, HongKong, Malaysia and across the Philippines.

IBS Worldwide Corp is founded by broadcast journalist Roy Bato. A self taught entrepreneur and digital transformation advocate.

Mass media has been the bloodmark of then young broadcast journalist Roy Bato, who worked in radio and television media in Davao City during the 1990s. After managing a number of radio stations soaring Davao, Butuan and Surgao airwaves, he decided to put himself up to greater challenges in print and broadcast media in Manila.

In February 2004 Mark Zuckerberg launched FaceBook and 9 months after Roy Bato launched his first company FishWink Media. From website, graphic design, content management and public relations Roy Bato expanded the business and in 2011 IBS Worldwide Corp was born as a software company we know today.

OUR MISSION

To help Businesses and governments run intelligently through technology. Offer new ideas for the old and be a purpose driven company.

OUR VISION

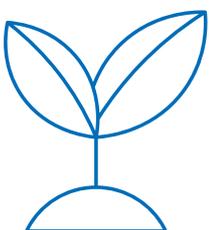

To make all sizes of business grow and be sustainable through technology and constant innovation. Embody our values and satisfy partners by exceeding expectations.

Values of IBS Worldwide Corp.

Innovation - Constantly generate innovative ideas and solutions, assuming reasonable risks. Constantly seeking excellence in our products and services. Constantly helping businesses run intelligently

People - To encourage, train and assist each of our staff whom we considered as partners to develop their capacities. To give back to the people for every blessing received.

Community, Environment and Ethics - To work with our communities and environment as a technology company and practice ethics with a deep desire to develop and promote fairness in public policies and practices.

Committed to help & serve the Government

Helping the Philippine Government utilize the power of technology since 2004

The future is technology but it requires the experience, the global skill sets, the network, the resources and the right company to empower the people and the entire Government agency. IBS Worldwide Corp is a private company set up purposely to help the Government.

Upfront commitment to Government agencies NO string attached

We offer FREE! NO string attached NO commitment
NO limit consultation and advice to all Government
agencies relative to technology.

What we offer

TOR (Term of Reference) - We help in creation, formulation, review, audit, edit, assistance on matters about Government Terms of Reference (TOR)

Project Management - We have the skill sets to assist and implement projects according to design and deadline.

Software Development - We have been building software the last 18 years from a simple to a complex application that help the Philippines propel to the future.

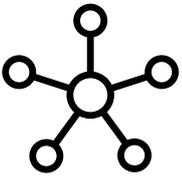

Cloud for Government - A specialized expertise in utilizing the power of cloud computing intended specifically for Government. Using complex architecture, security and a mission critical framework.

Paperless Government - May sound simple but difficult to achieve. The good thing is we can help a small division to an entire agency go paperless with style and less complexity.

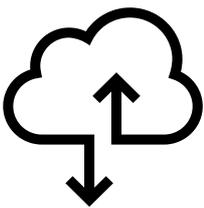

What we offer

Technology Architecture - We help Government institution architect a concept to a working blueprint to provide clarity of a project on a long term perspective.

Technical Documentation - A critical component we are good at while some mostly fail. Technical documentation is a unique writing technique that requires specialization.

Integration of Technology - We help connect technologies and put things to work together in a seamless or bridge type ecosystem to achieve efficiency across departments.

Connectivity for Government - From intra to internet, wireless to fiber optics or 5G connectivity. We can help connect every room, department, agencies regardless of location.
